

ABOUT ME

I'm a Senior iOS developer with 10+ years of experience, having started iOS development with the initial launch of the iPad and iOS 3.2.

I'm passionate about building apps that people love and help companies deliver the best user experience possible to their end users.

If you need help building your next mobile app or augment your existing team please drop me an email.

WORK EXPERIENCE

YAP PAYMENT SERVICES PROVIDER LLC
Remote
Oct 2022 - Dec 2022

Lead iOS Engineer

EDB Business Banking

YAP Payment Services Provider LLC has ended it's collaboration with it's main service provider due to it being unable to deliver in a predictable manner. I was tasked with the delivering a pivotal integration for the B2B app.

- Was **responsible of the integraion with UAE PASS**, a state backed digital identity provider that helped drive onboardings and strealined the KYC process.
- Setup a continuos delivery pipeline that **reduced the release time by 90%**.

Skills: iOS, Swift, RxSwift, AutoLayout, Git, Fastlane, MVVM, Agile

PAYSAFE LIMITED
Remote
Mar 2022 - Sep 2022

Senior iOS Engineer

Paysafe Card

Paysafe Group was going through a complete redesign of one of its consumer apps, Paysafe Card. I joined the team in its effort to bring that release to the market on the deadline.

- Improved the strong customer authentication flows for direct debit payments to help Paysafe comply with regulatory requirements.
- Rewrote the KYC process that drastically improved the user experience of the flow.

Skills: iOS, Swift, RxSwift, APNS, AutoLayout, Git, Fastlane, MVVM, Agile

GRAVYSTACK INC.
Remote
Aug 2021 - Feb 2022

Lead iOS Engineer

GravyStack App

GravyStack Inc, a neo-banking app that gamifies financial literacy for kids, was under pressure to deliver a fully working app in a couple of weeks to secure funding.

- Was responsible of building the project architecture in SwiftUI and Combine as well as teaching the rest of the team how to use these frameworks to maximise output.
- **Create a product from scratch in a matter of weeks** with a flexible and easily extendable codebase.

Skills: iOS, Swift, Combine, SwiftUI, Git, Fastlane, MVVM, Agile

COMPUGROUP MEDICAL
Remote
Mar 2020 - Aug 2021

Lead iOS Engineer

CGM Life SDK

CompuGroup Medical invited me to join their CGM Life SDK team in March 2020. The CGM Life SDK team was at the core of multiple products across the company and I was tasked with leading the iOS SDK.

- **Reduced the iOS SDK size in half** by switching the delivery method of the bynaries from a static library to a dynamic framework.
- **Brought the Swift SDK on par with the older Objective-C SDK** and helped teams inside CGM transition to the new SDK.

Skills: iOS, Swift, Obejctive-C, Code generation, Git, Fastlane, MVVM, Agile

COMPUGROUP MEDICAL
Remote
Jul 2018 - Feb 2021

Lead iOS Engineer

ClickDoc

CompuGroup Medical was trying to enter the German and France market with a new product for doctor appointments and required constant feedback from doctors and patients as they were serving a two-sided market.

- Set up a continuous delivery pipeline that reduced the delivery time on new builds in half from what the customer was previously experienced.
- Helped building new features as well as improving the overall architecture and code quality of the project.

Skills: iOS, Swift, Obejctive-C, Alamofire, Git, Fastlane, MVVM, Agile

ENDAVA
Remote
Jun 2014 - May 2018

Lead iOS Engineer

Betalingsservice

NETS, one of Endava's clients, needed help with building a mobile app as they were under serious pressure from one of their competitors that could see their Betalingsservice product out of business.

- Developed and released an app in a matter of months. Drove the desing, implementation and feature parity with Android.
- Managed to get to 700.000 installs in a couple of months, more that 12% the country's population.

Skills: iOS, Swift, APNS, Obejctive-C, CoreData, Alamofire, Git, Fastlane, MVVM, Agile

NTT DATA
Remote
Feb 2013 - May 2014

Senior iOS Engineer

Wolters Kluwer, one of NTT Data's clients, needed help bringing one of their desktop software for lawyers in Germany to mobile.

- I was the solo developer in a cross functional team building a solution helping lawyers more easily prepare and document cases.
- Build a Titanium SDK wrapper over CoreData

Skills: iOS, Obejctive-C, CoreData, Autolayout, Git, Agile

XIVIC LLC
Remote
Jun 2011 - Jan 2013

iOS Engineer

Worked on various projects for media outlets as well as products in the advertising market. Most of the projects were built using MVC and Objective-C.
